Lesson Objectives

- To introduce the other account types available in QuickBooks
- To learn how to track credit card transactions in QuickBooks
- To reconcile a credit card account
- To see how to make a credit card payment
- To discuss the different types of asset and liability accounts you can create and see how to track assets and liabilities in QuickBooks
- To introduce the subject of equity and QuickBooks equity accounts

Other Account Types in QuickBooks

In this lesson you'll learn about these types of QuickBooks accounts:

- **Credit card accounts** – Used to track transactions you pay for with a credit card
- **Asset accounts** – Used to track both current assets (those assets you're likely to convert to cash or use up within one year, such as inventory on hand) and fixed assets (such as long-term notes receivable and depreciable assets your business owns that aren't liquid, such as equipment, furniture, or a building)
- **Liability accounts** – Used to track both current liabilities (those liabilities scheduled to be paid within one year, such as sales tax, payroll taxes, and short-term loans) and long-term liabilities (such as loans or mortgages scheduled to be paid over terms longer than one year)
- **Equity accounts** – Used to track owner's equity, including capital investment, draws, and retained earnings

NOTES

Entering Credit Card Charges

QuickBooks lets you choose when you enter your credit card charges. You can enter credit card charges when you charge an item or when you receive the bill. Your choice depends on whether you like to enter information into QuickBooks incrementally or all at once. The advantage to entering charges when you charge an item is that you can keep close track of how much you owe. In addition, if the charge is for a particular job, you can keep track of how much you're spending on that job.

To enter a credit card charge:

1. From the **Banking** menu or **Home** screen, choose **Enter Credit Card Charges**.

2. In the **Credit Card** field, select the appropriate credit card account.
3. In the **Purchased From** field, enter the name of the vendor from whom you made the purchase.
4. Enter the remaining information about the charge (date, reference number, amount, memo, etc.).

- In the detail area, click the **Account** column and assign the charge to the corresponding expense account.

Enter Credit Card Charges - QuickBooks Credit Card

NOTES

Reconciling a Credit Card Statement

To reconcile a credit card statement:

1. From the **Banking** drop-down, choose **Reconcile** or **Reconcile Credit Card**.
2. In the **Account** drop-down, choose the appropriate credit card from the list.

Begin Reconciliation

Select an account to reconcile, and then enter the ending balance from your account statement.

Account: 20600 - CalOil Credit Card

Statement Date: 12/15/2020

Beginning Balance: 436.80

Ending Balance: 412.62

What if my beginning balance doesn't match my statement?

Enter any finance charge.

Finance Charge	Date	Account	Class
0.00	11/30/2020		

Locate Discrepancies | Undo Last Reconciliation | Continue | Cancel | Help

3. In the **Statement Date** field enter the closing date of the statement you wish to reconcile.
4. In the **Ending Balance** field enter the ending balance of the statement you wish to reconcile.
5. Click **Continue**. Proceed to next exercise.

Marking Cleared Transactions

To mark the transactions as cleared:

1. Place a checkmark in the **Hide transactions after statement's end date** to only show transactions dated up to and including the statement end date.
2. In the **Charges and Cash Advances** section of the window, match the transactions with the charges on your statement. Click a checkmark next to each transaction in QuickBooks that appears on your statement. This marks the transaction as cleared in your QuickBooks register.
3. In the Payments and **Credits** section of the window, click a checkmark next to each transaction that matches your statement to mark the payments as cleared in the register.

You can open a transaction to view it and make changes to it if necessary by double-clicking on the transaction in the reconciliation window.

4. When you are done with this process, the Difference in the bottom right corner should be zero. When this difference is zero *and only when this difference is zero*, click **Reconcile Now**.

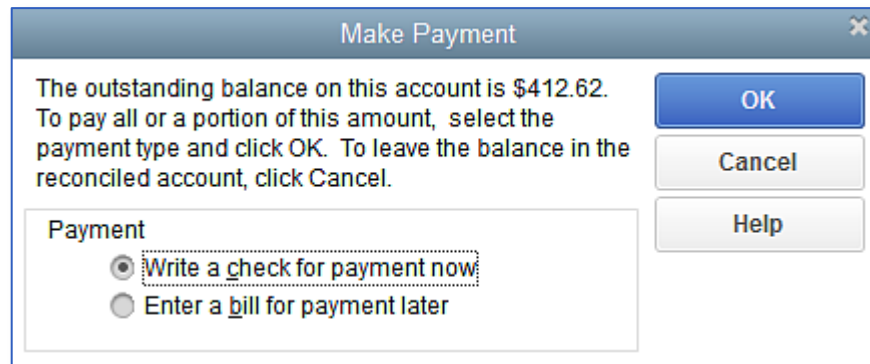

For period: 12/15/2020 Hide transactions after the statements end date

- QuickBooks will ask you if you would like to enter a bill or write a check for the remaining balance on your credit card. You can choose one of these options or click **Cancel** if you would rather not do either one at this time.

- In the **Select Reconciliation Report** window you can choose to display or print your reconciliation reports. It is important to print both the Summary and Detail reports, and a best practice to save them as PDF's for future reference.

NOTES

Paying a Credit Card Bill

To write a check for the bill now (continued from the reconciliation above):

1. After reconciling, when you select **Write a check for payment now**, the Write Checks window will open. Make sure **Checking** is listed as the bank account.
2. Click in the **Pay to the Order of** field and select the name of the credit card company.
3. Notice the account is prefilled with the CalOil Credit Card account (a credit card account).

NOTES

Working with Asset Accounts

IMPORTANT: *The remaining sections are somewhat advanced. It may be advisable to consult with your accountant or tax professional for assistance in dealing with these topics.*

An Other Current Asset account tracks assets that are likely to be converted to cash or used up within one year. If you buy and sell inventory, the value of your entire inventory on hand usually appears in an Other Current Asset account called something like Inventory Asset. Other current assets might include treasury bills, certificates of deposit, prepaid expenses, prepaid deposits, reimbursable expenses, and notes receivable (if due within one year).

A Fixed Asset account tracks assets your business owns that are not likely to be converted into cash within a year. A fixed asset is usually something necessary for the operation of your business, like a truck, cash register, computer or photocopier.

To set up an Other Current Asset account:

1. On the **Home** page, click **Chart of Accounts** (or use **CTRL+A** or any other method of opening the Chart of Accounts).
2. Click the **Account** menu button in the bottom left corner of the Chart of Accounts, then choose **New**.
3. Click **Other Account Types** and choose **Other Current Asset** from the drop-down list.

Add New Account: Choose Account Type

[Help me choose the right account type.](#) **Continue** **Cancel**

- Click **Continue**.
- Enter the account **Number** and **Account Name** you would like to use. You may also enter a **Description** if you'd like.

The screenshot shows the 'New Account' dialog box in QuickBooks. At the top, there is a grid icon, a label 'Account Type' with a dropdown menu set to 'Other Current Asset', and a 'Number' field containing '13200'. Below this is a section for 'Account Name' with a text box containing 'PrePaid Rent' and a 'Subaccount of' dropdown menu. An 'OPTIONAL' section follows, containing a 'Description' text box, an 'Account No.' text box, and a 'Tax-Line Mapping' dropdown menu set to 'B/S-Assets: Other current ass...'. To the right of the 'Tax-Line Mapping' dropdown are two links: 'How do I choose the right tax line?' and 'Should I enter an opening balance?'. Below the 'Tax-Line Mapping' dropdown is a button labeled 'Enter Opening Balance...'. At the bottom of the dialog box are three buttons: 'Save & Close' (highlighted in blue), 'Save & New', and 'Cancel'.

- Click **Save & Close**.

NOTES

Setting Up Asset Accounts to Track Depreciation

Fixed assets are equipment or property your business owns that is not for sale. Since they last a long time, you don't completely charge their cost to the year in which you buy them. Instead, you spread their cost over several years. But because fixed assets wear out or become obsolete, their value declines constantly from the day you purchase them. The amount of this decline in value is called depreciation. Over time, the amount of depreciation accumulates and you can see the total decline in value at any point in time by looking at the accumulated depreciation as of that date. The accumulated depreciation account is generally set up as a fixed asset account, and is very often set up as a subaccount of a fixed asset parent account.

To set up asset accounts to track a new trailer purchased by Rock Castle Construction:

1. In the **Chart of Accounts** window, click the **Account** menu button in the bottom left corner, then choose **New**.
2. In the **Add New Account** window, select **Fixed Asset** and click **Continue**.
3. Enter the **Number** and **Account Name** you would like to use, as well as a **Description** if you'd like.
4. Do not enter an Opening Balance.
5. Click **Save & Close**.

NOTES

Tracking a Loan with a Long Term Liability Account

A Long Term Liability account tracks debts that your business is not likely to pay off within a year. The most common long-term liabilities are loans that you expect to pay off in more than one year.

Tracking a loan with a Long Term Liability account:

1. In the **Chart of Accounts**, click the **Account** menu button in the bottom left corner, then choose **New**.
2. In the **Add New Account** window, select **Other Account Types** then choose **Long Term Liability** from the drop-down list.
3. Click **Continue**.
4. Enter the **Number** and **Account Name** you would like to use, as well as a **Description** if you'd like.

The screenshot shows the 'Add New Account' window in QuickBooks. At the top, 'Account Type' is set to 'Long Term Liability' and 'Number' is '23150'. The 'Account Name' field contains 'Trailer Loan'. Below it is a 'Subaccount of' field with a dropdown arrow. An 'OPTIONAL' section contains a 'Description' field, an 'Account No.' field, and a 'Tax-Line Mapping' dropdown set to 'B/S-Liabs/Eq.: L-T Mortgage/n...'. To the right of the tax-line mapping are two links: 'How do I choose the right tax line?' and 'Should I enter an opening balance?'. At the bottom of the optional section is a button labeled 'Enter Opening Balance...'.

5. Do not enter an Opening Balance.

6. Click **Save & Close**.

NAME	TYPE	BALANCE TOT...	ATTACH
23150 - Trailer Loan	Long Term Liability	0.00	
23200 - Loan - Vehicles (Pickup Truck)	Long Term Liability	22,641.00	
28100 - Loan - Construction Equipment	Long Term Liability	13,911.32

Account Activities Reports Attach Include inactive

Because this is a new loan, you are either receiving money to deposit in your bank account or receiving a new asset. In this example, you received an asset (the new trailer), so you need to show an increase in the asset's Cost account.

To record an increase in the asset's Cost account:

1. In the **Chart of Accounts**, double-click the asset account that describes the asset you purchased (in this example, it would be the Trailer asset).
2. In the **Increase** field, enter the dollar amount for which the asset was purchased.
3. In the **Account** field, select the corresponding liability account that was used to purchase the asset (in this example the Trailer Loan liability account).

DATE	REF	PAYEE	DECREASE	INCREASE	BALANCE
TYPE	ACCOUNT	MEMO			
12/15/2...	Ref	Payee			
	TRANSF	23150 - Trailer Loan	Decrease	30,000.00	
ENDING BALANCE					0.00

Splits
 1-Line
 Sort by: Date, Type, Number/Ref

4. Click **Record**.
5. Close the register window.
6. Close the Chart of Accounts.

You can enter the trailer on the Fixed Asset Item list. Tracking fixed assets using the Fixed Asset Item list enables you to record such detailed information about an asset as the purchase date and price, whether the asset was new or used when purchased, and the asset's sale price if you decide to sell it. You can also generate customizable reports listing all your fixed assets.

Entering information on the Fixed Asset Item List does not in any way affect your general ledger, and therefore does not double-count the entry in which you purchased the asset and incurred the loan.

To create a fixed asset item:

1. From the **Lists** menu, choose **Fixed Asset Item List**.

Item ▼ Activities ▼ Reports ▼ Attach Include inactive

2. Click the **Item** menu button and select **New**.

3. In the **Asset Name/Number** field, enter the name of the asset.
4. Enter the remaining information to complete the **Purchase Information** section.
5. Enter the remaining information to complete the **Asset Information** section.
6. Choose the corresponding asset account from the **Asset Account** drop-down list.

The screenshot shows the 'New Item' dialog box in QuickBooks. The 'TYPE' is set to 'Fixed Asset'. The 'Asset Name/Number' is 'Trailer' and the 'Asset Account' is '15150 - Trailer'. The 'PURCHASE INFORMATION' section includes 'Purchase Description' (Trailer), 'Date' (12/15/2020), 'Cost' (30,000.00), and 'Vendor/Payee' (East Bayshore Auto Mall). The 'SALES INFORMATION' section includes 'Sales Description', 'Sales Date', 'Sales Price' (0.00), and 'Sales Expense' (0.00). The 'ASSET INFORMATION' section includes 'Asset Description' (White Trailer with Company Logo), 'Location', 'PO Number', 'Serial Number' (123456789), and 'Warranty Expires' (12/15/2025). There is also a 'Notes' field at the bottom.

7. Click **OK**.
8. Close the Fixed Asset Item list.

NOTES

Recording a Payment on a Loan

When it's time to make a payment on a loan, use the Write Checks window to record a check to your lender. Assign part of the payment to loan interest expense and the remainder to loan principal.

To record a payment on a loan:

1. From the **Banking** menu choose **Write Checks**.
2. In the **Pay to the Order of** field enter the name of the lender.
3. Enter the dollar amount of the payment in the **Amount** field.
4. Click in the **Account** column on the **Expenses** tab and enter the liability account you are paying against. You can use multiple accounts/lines here to account for principal payment vs interest expense.

Save & Close Save & New Clear

5. Click **Save & Close** to record the payment.
6. The split between principal and interest as they comprise the total payment will change from payment to payment, in accordance with the loan amortization schedule.

When you record the transaction, QuickBooks automatically updates the accounts affected by this transaction:

- In your checking account, QuickBooks subtracts the amount of the check from your balance
- In the expense account that tracks interest, QuickBooks enters the interest amount as an increase to your company's interest expense
- In the Trailer Loan liability account, QuickBooks subtracts the principal amount from the current value of the liability (reducing the amount of your debt)

NOTES

Introduction to Equity Accounts

Equity on your company's balance sheet is defined as the company's net worth. The total of assets less total liabilities equals the equity.

Equity is comprised of the company's Retained Earnings (or Owner's Equity if it is not an incorporated company) since the company's inception (incremented each year by that year's Net Income if it is positive, or reduced by that year's Net Income if it is negative or a loss), adjusted for, if they exist:

- ◆ Dividends paid out or Owner's draw (these reduce equity)
- ◆ Common or preferred shares (these increase equity)
- ◆ Contributed or paid-in capital

Using Other Accounts in QuickBooks — Review Questions

1. Accumulated depreciation is typically set up as what type of account in QuickBooks?
 - a. A subaccount of a fixed asset account
 - b. A subaccount of a current asset account
 - c. A subaccount of a liability account
 - d. An expense account
2. Equity type accounts would be used to track which of the following?
 - a. Capital investments
 - b. Draws
 - c. Retained earnings
 - d. All of the above
3. Which of the following would likely be considered a long-term liability?
 - a. Vehicle loan
 - b. Accounts payable
 - c. Rent
 - d. Credit card account
4. Retained earnings is defined as which of the following?
 - a. The amount of money that a business retains for paying its employees
 - b. The earnings from non-essential business services
 - c. The amount of interest saved from paying off a loan early
 - d. The accumulation of a company's net income or loss from its start date
5. Which of the following would not decrease the value of a company's equity?
 - a. The company paying corporate dividends
 - b. The company incurring a net loss for the fiscal year
 - c. An owner drawing money out of the company
 - d. The company taking a loan out to purchase a new asset

Review Activities

Assume that the owner of Rock Castle Construction has taken out a loan and purchased a computer system for \$15,000. He wants to track the accumulated depreciation and cost of the system in two separate fixed asset accounts.

1. Create a fixed asset account called *Computer System*.
2. Create a long-term liability account to track the loan.
3. Enter the amount of the loan as an increase in the asset's account. Assign the transaction to the loan liability account.

Answers to Review Questions

1. Accumulated depreciation is typically set up as what type of account in QuickBooks?
 - a. ✓ A subaccount of a fixed asset account
 - b. A subaccount of a current asset account
 - c. A subaccount of a liability account
